Skills

Languages: Python, TypeScript, JavaScript, Go, C++, C, Kotlin, Java, Bash, SQL

Technologies: Node, Git, Linux, GCP, AWS, Terraform, Docker, NoSQL, RDBMS, GraphQL, MongoDB, Postgres, Next.js, Svelte

Certificates: AWS Certified Developer, AWS Certified Cloud Practitioner, Manage Kubernetes in Google Cloud

Employment

Founding Engineer

Nov 2025 – Present

Solstice Health

- Delivered a full **SOC 2-compliant AWS migration** from Railway with private subnets, an SSH bastion host, horizontally scalable APIs on **ECS Fargate**, worker orchestration through **Redis/Celery**, and end-to-end observability in **Datadog**.
- Owned product and engineering delivery from **0 to 1**, helping scale Solstice from **\$200K ARR to \$3.5M ARR in 6 months** and supporting growth from a **\$13M seed** to a **\$90M Series A valuation**.
- Built a **state-of-the-art email editor** with drag-and-drop and edit heuristics that preserved cross-platform compatibility.
- Shipped **Agentic chat for claims generation** grounded in clinical documents with **RAG** retrieval and exact source-text polygon mappings, and owned an internal operations platform for request assignment with integrated QC workflows.

Founding Engineer

Jul 2025 – Oct 2025

Clarion (YC W24)

New York, NY

- Designed **AI voice workflows in Vapi** with multi-assistant transfers and tool calls that accurately extract intake data, check availabilities, and book appointments directly in EHR systems.
- Built **RPA pipeline** polling eCW patient data to power automated reengagement campaigns, calling patients with appointment reminders and generating **\$100k+** in booked appointments for clinics.
- Extended Acuity integration with unified EHR models in **NestJS** and **Supabase**, navigating ambiguous client requirements through direct communication and scoped weekly meeting agendas to deliver custom **forward-deployed solutions**.

Full Stack Developer

Sep 2024 – Jun 2025

Quantified Health

Toronto, ON

- Developed a patient scheduling platform using **Next.js** and ShadCN, integrating OpenPhone and Resend for automated email/SMS notifications; reduced manual booking time by **30 hours/week** and decreased patient no-shows by **80%**.
- Integrated **Stripe** payment processing to streamline the appointment-to-checkout flow, generating over **\$200K** in revenue.
- Developed a **Python ETL pipeline** for patient data from **MongoDB**, Stripe, and Cal.com via **GraphQL**, specifically collecting and analyzing user attribution data to guide leadership in directing **effective ad campaigns**.

Projects

ApeironDev IDE (github, demo)

May 2025 – Jun 2025

- Architected a **cloud-native Web IDE** with **Agentic RAG code-assist** using **LangGraph**, leveraging **Terraform** to deploy a microservices backend on **GCP**, optimizing resource utilization and building robust systems to scale.
- Delivered secure, sandboxed code execution in lightweight **Docker** containers and ensured globally consistent state transactions in a **distributed system** using **Two-Phase-Commit** with Optimistic Concurrency Control.

TalentMatch (AI Hackathon Winner) (github, demo)

Jun 2025

- Delivered a functional AI-enabled talent matching platform POC following an **AI-native** workflow with **Cursor**, custom project rules for model consistency, and **MCP** to manage **Supabase** assets using natural language.
- Built a 2-stage candidate **recommendation system** that compares job to user profile embeddings indexed using **Cohere Embed** and then applies **Cohere's Rerank** model to suggest top-N candidates to the recruiter.

Education

University of Waterloo

2020 – 2025

Bachelor of Computer Science, 3.7 GPA
